

Logitude

A CHAMP community solution

First true Freight Forwarding online solution, developed specifically for the cloud

About Logitude World

After over a decade of developing and implementing freight forwarding software for hundreds of projects and for all sizes of companies, we realized the change we could create by combining our knowledge with emerging technologies. The rise of cloud computing enables the creation of a universal infrastructure to connect freight forwarders, their customers, and other logistics partners.

This is also an opportunity for small and medium size freight forwarders to obtain the IT capabilities of big players at minimal cost and almost immediately.

Designed using state-of-the-art technologies for the utmost customer convenience, scalability, security, and functionality, Logitude World solutions are advanced yet easy to use. They allow customers to maximize operational efficiency and productivity in the global market. Most importantly, Logitude World helps customers generate more sales and provide better service to their clients and partners.

Logitude World's team of dedicated professionals combines hundreds of man-years of experience in international trade & logistics and is committed to helping companies become more successful than ever.

Easy to Start

- You can be up and running in minutes - all it takes is an internet connection.
- There is neither a need for complex implementation nor for any upfront fees.

Benefits

Logitude World's freight forwarding solutions provide you with great benefits.

- Collaborative features allow customers and partners to share information.
- Rich feature set to handle the full shipment lifecycle.

*There are neither risks taken nor commitments to made
when you join our world - the Logitude World.*

The Logitude World Solution

Whether you are a freight forwarder, consolidator, an NVOCC in need of a full solution, or an import/export manager who tracks shipping activities, Logitude World has the answer for you.

Freight forwarding metamorphosed during the last decade, and the role of freight forwarder is undergoing a revolution. In today's broad global network, freight forwarders are becoming logistics service providers (LSP), and customers are demanding faster deliveries and better services at reduced prices.

In this rapidly changing world, the challenges are to remain in control while being more efficient and better serving customers.

As a small/medium size forwarder, can you afford the cost of purchasing a state-of-the-art software solution, implementing it, and keeping pace with today's ever-changing environment?

- Logitude World brings you a modern solution which employs the newest technology, is rich in functionality, and is easy to use.
- Logitude World enables you to focus on freight forwarding, thus providing better customer service.

Logitude World's solution covers the full freight forwarding lifecycle:

- From quotes and shipments processing to billing and collections.
- From employees and accounting to salesmen and managers.

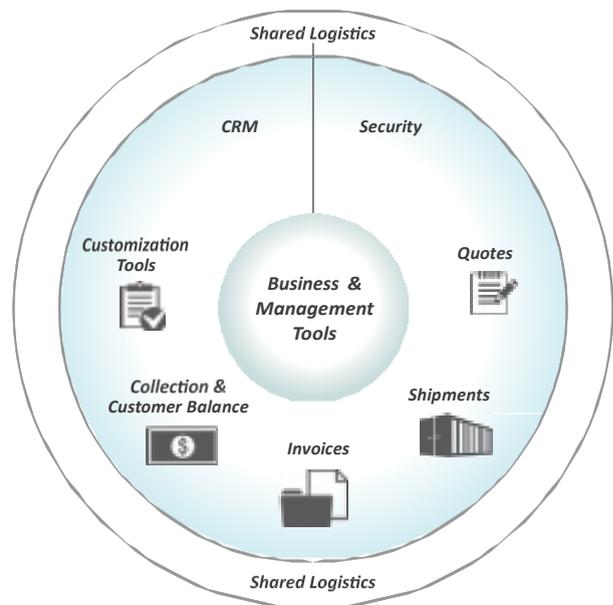

Come and work with us, and every role player in your business will benefit from a powerful yet simple solution, and for an affordable price.

Technology

Logitude World is the first true online freight forwarding software solution.

It combines the power of cloud computing and modern technologies with a deep acquaintance of freight forwarding.

Until recently, freight forwarding solutions were complex and required up-front capital investment, IT support resources, on-site support, as well as major implementation and adaptation efforts.

Logitude World has changed all that with its pioneering online software solution. The solution is based on world leading technologies that provide excellent security, availability, reliability, performance, and exceptional usability - all at minimal cost, commitment and risk.
